

Strings

Exercises

Exercise 1

- Get the following pieces of information from the user:
 - Title (Mr., Mrs., Dr., Ms., etc.)
 - First name
 - Last name
- Create a string that contains the title, first initial followed by a period, and the last name. It should include a space between each of the 3 elements
- Print the final string

Example: Mrs. L. Henderson

Exercise 2

- Extract ranks and names from line from baby name data

1	John	89,950	Mary	91,668
2	William	84,881	Anna	38,159
3	James	54,056	Emma	25,404
4	George	47,651	Elizabeth	25,006
5	Charles	46,656	Margaret	21,799
6	Frank	30,967	Minnie	21,724
7	Joseph	26,292	Ida	18,283
8	Henry	24,139	Bertha	18,263
9	Robert	24,074	Clara	17,717
10	Thomas	23,750	Alice	17,142

Exercise 2 continued

- Given:

info = "1 John 89,950 Mary 91,668"

- Extract rank (1) and the two names (John and Mary)
- This example would print:

John has rank 1

Mary has rank 1

Exercise 3

- ZyLab 10.10 Acronyms
